Which of the following optional and recommended properties do you use when registering DOIs? [check all that apply]
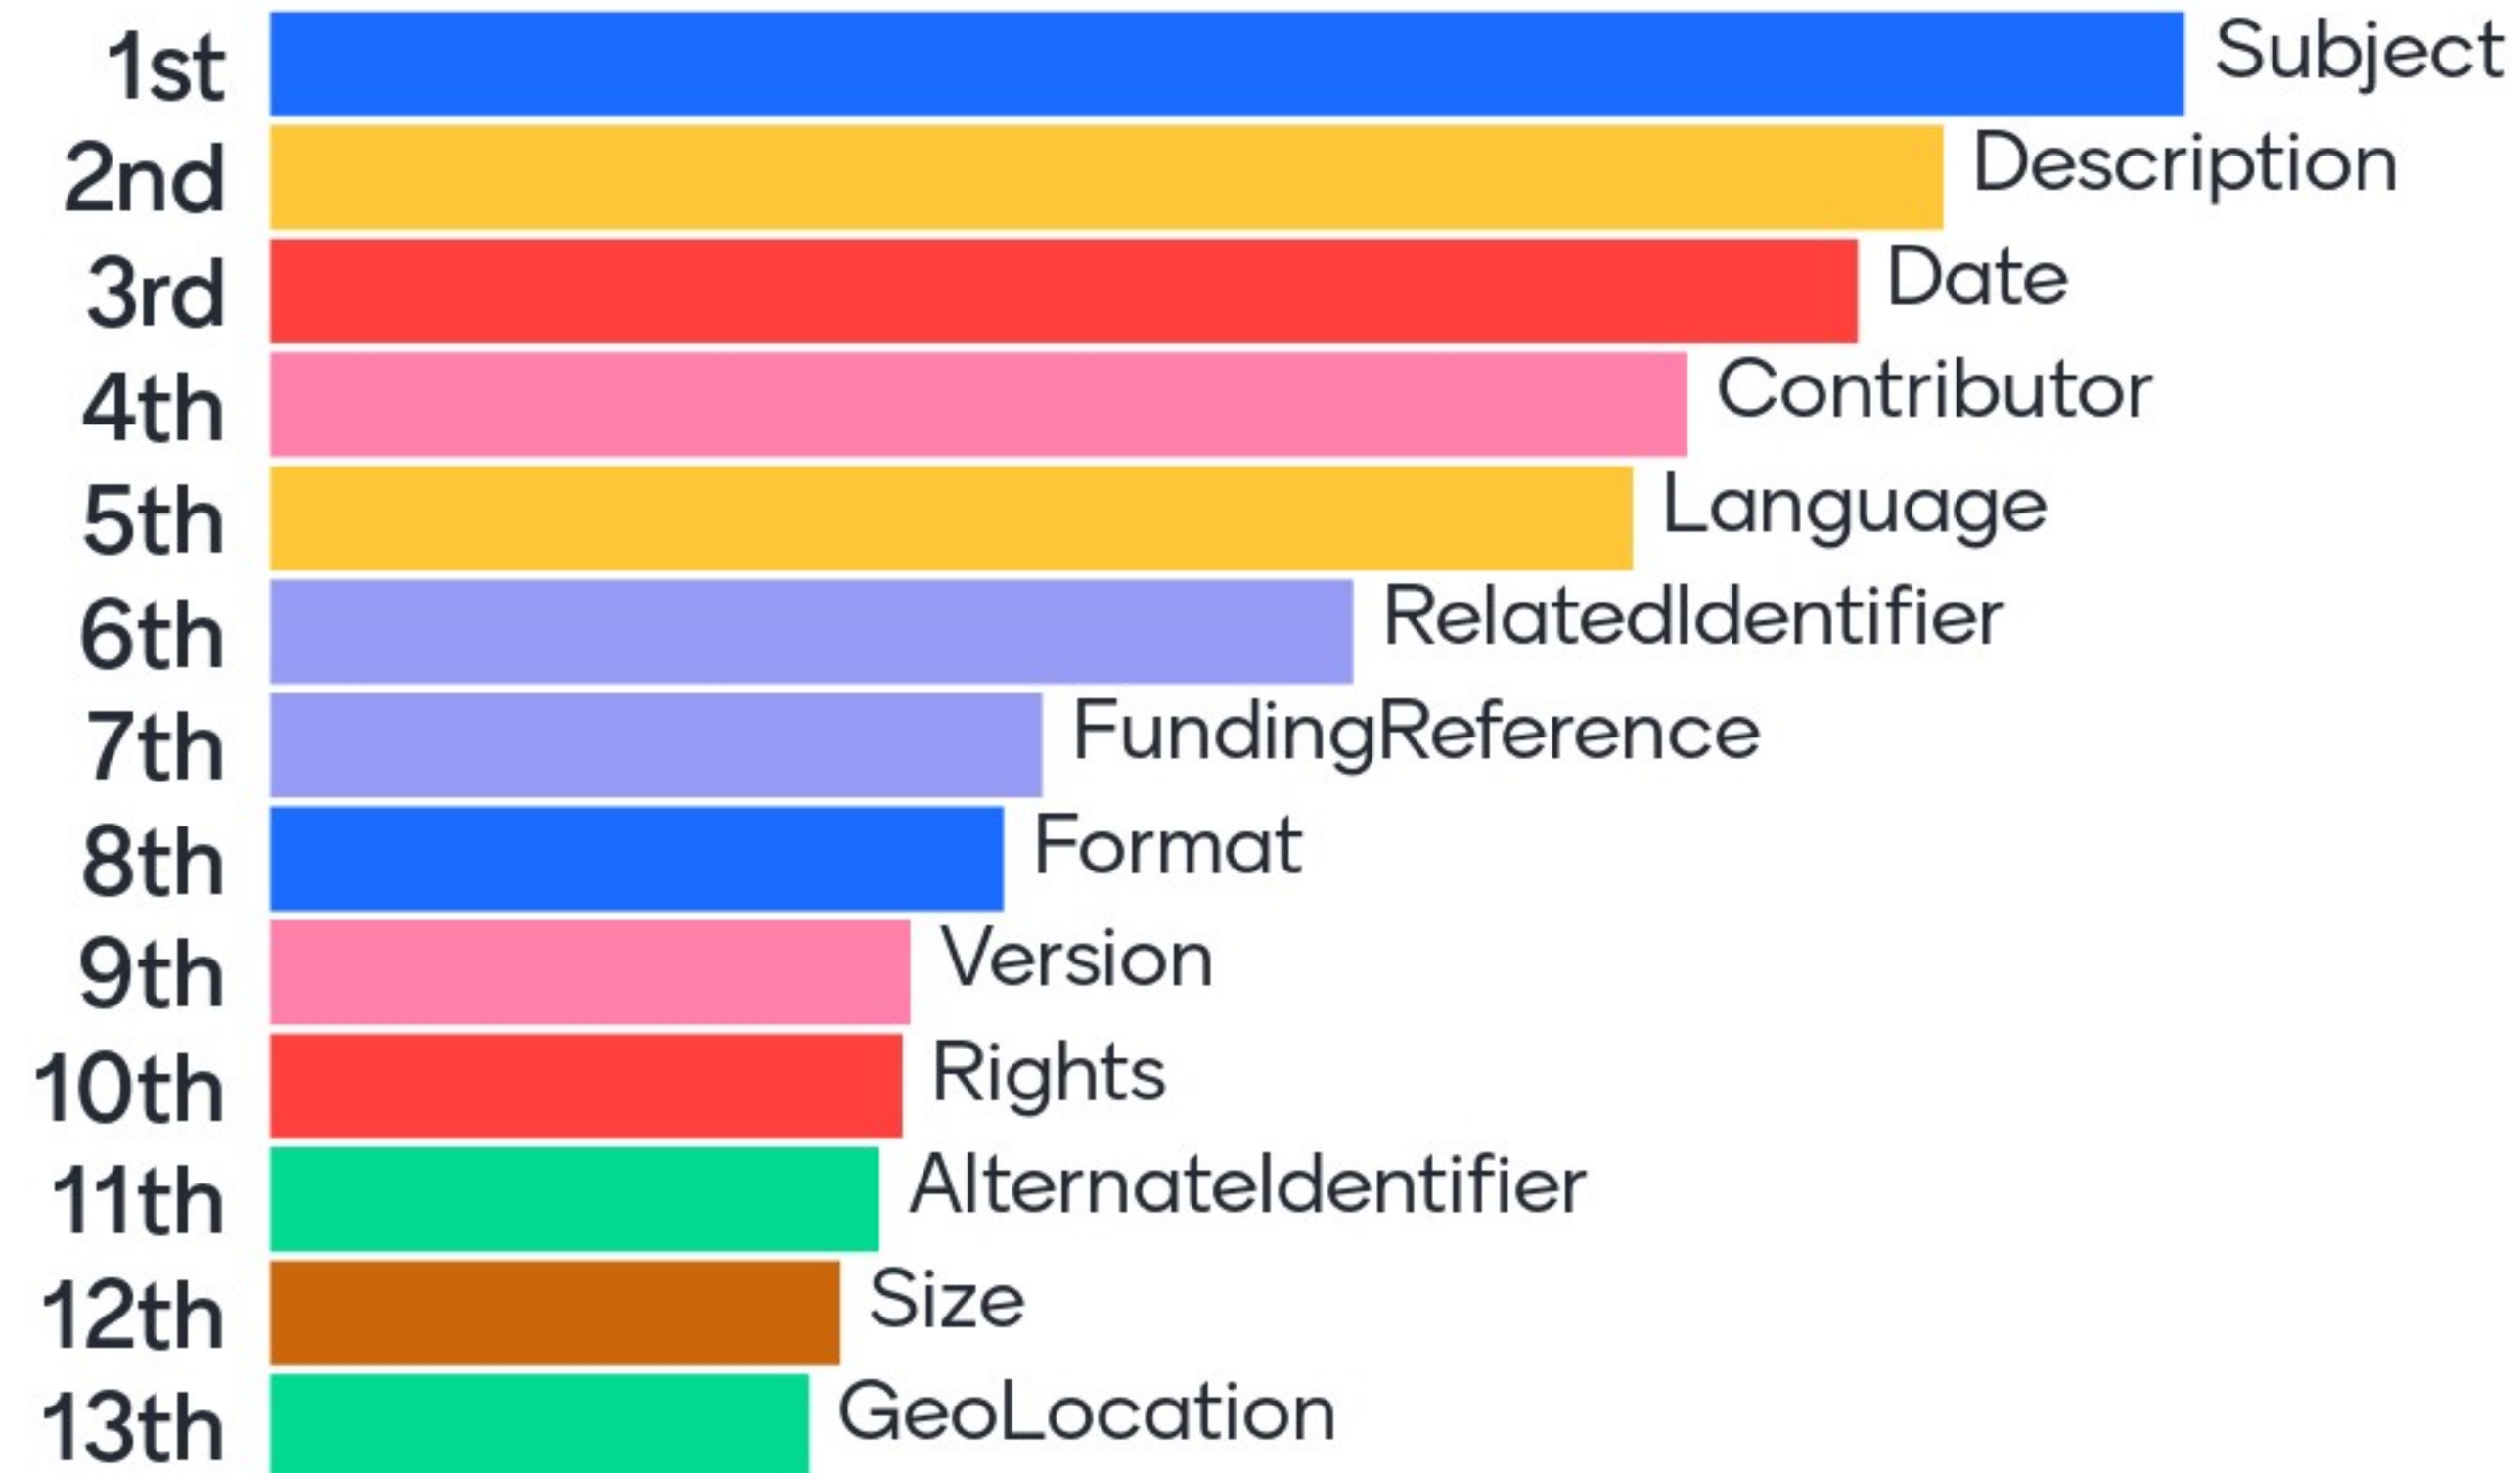

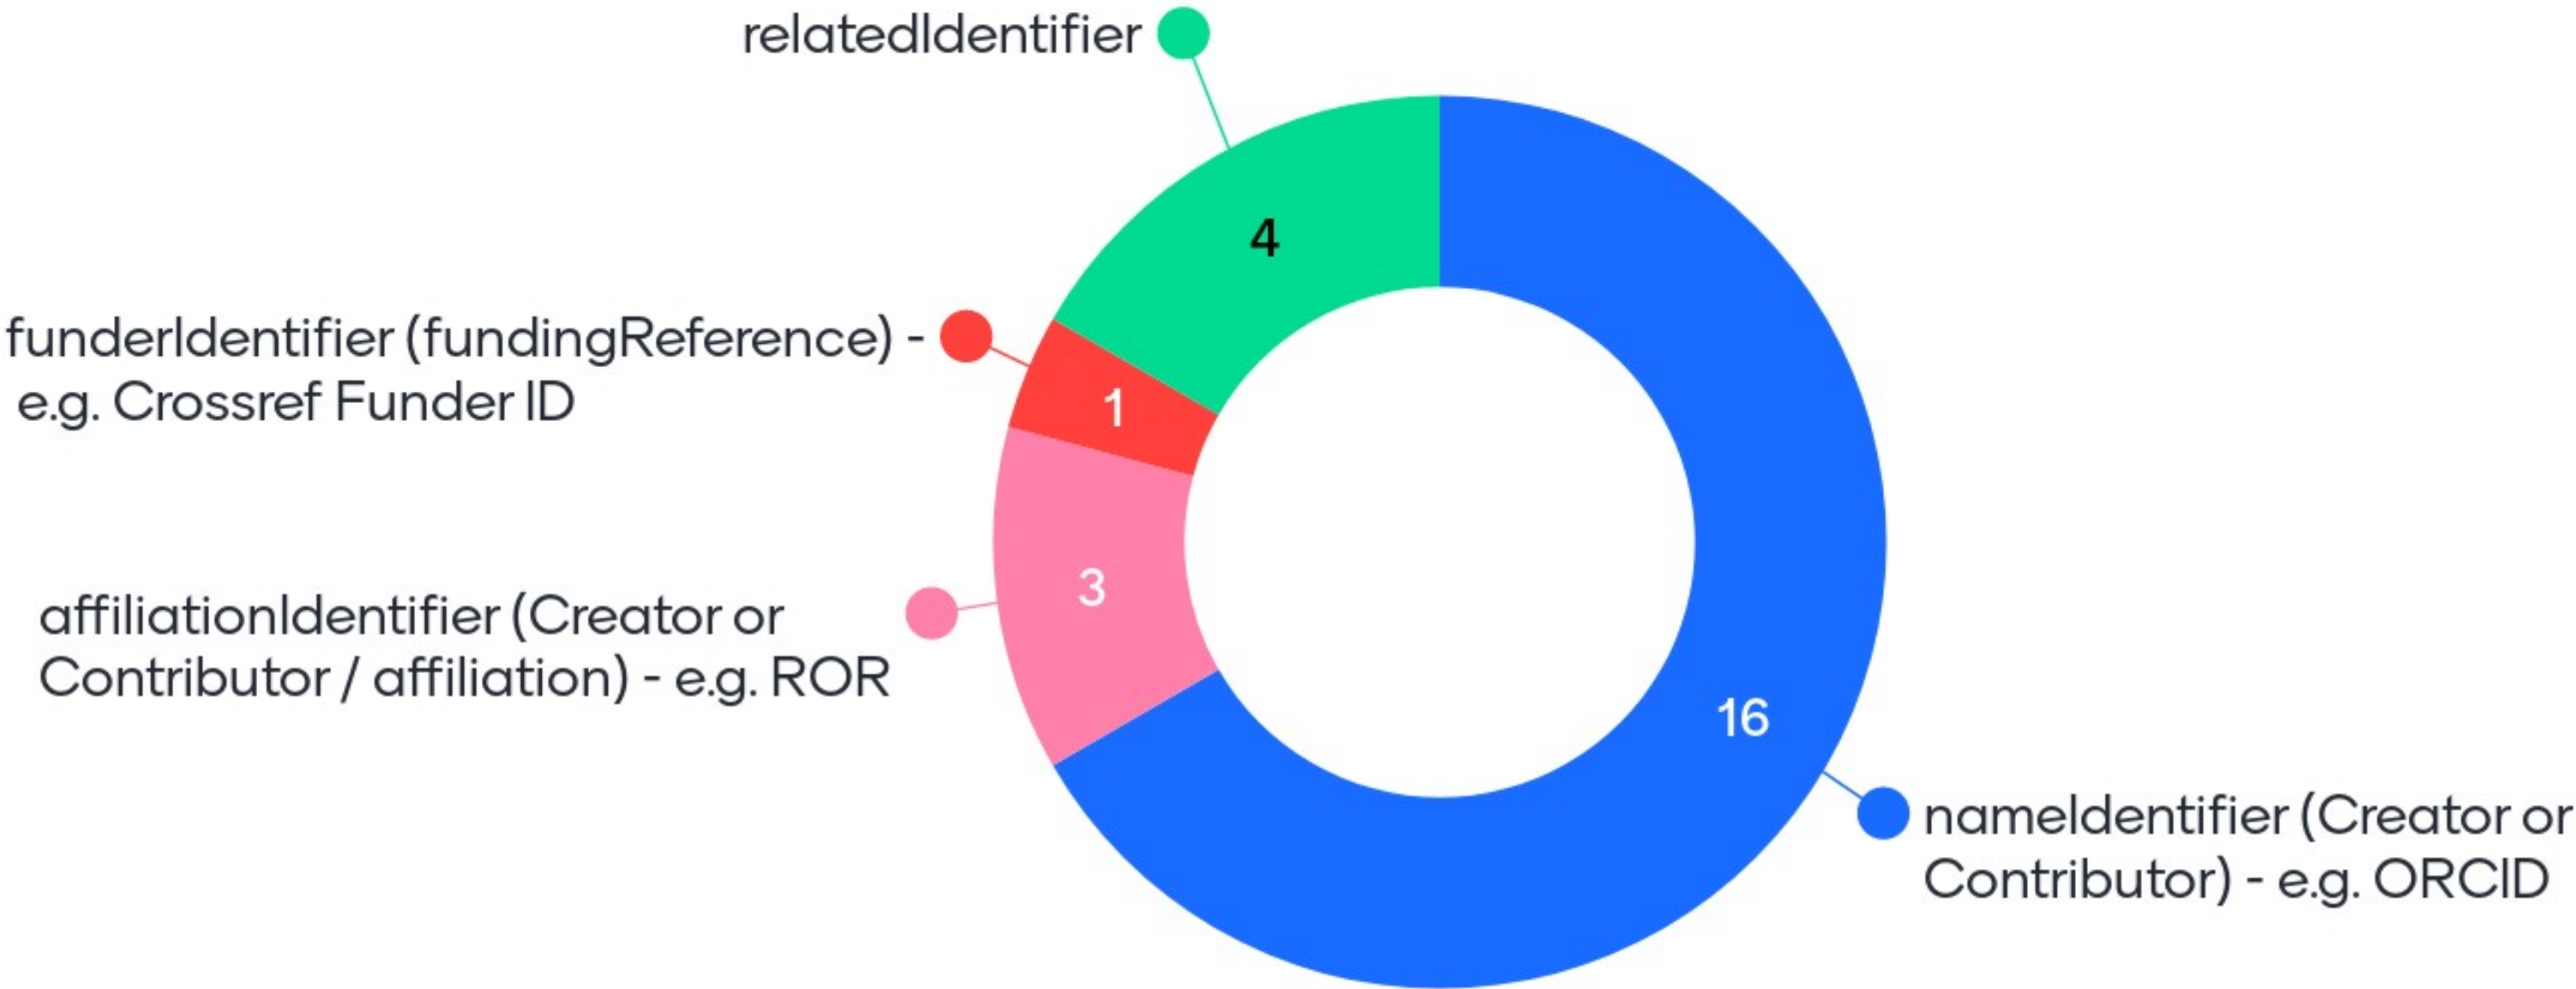

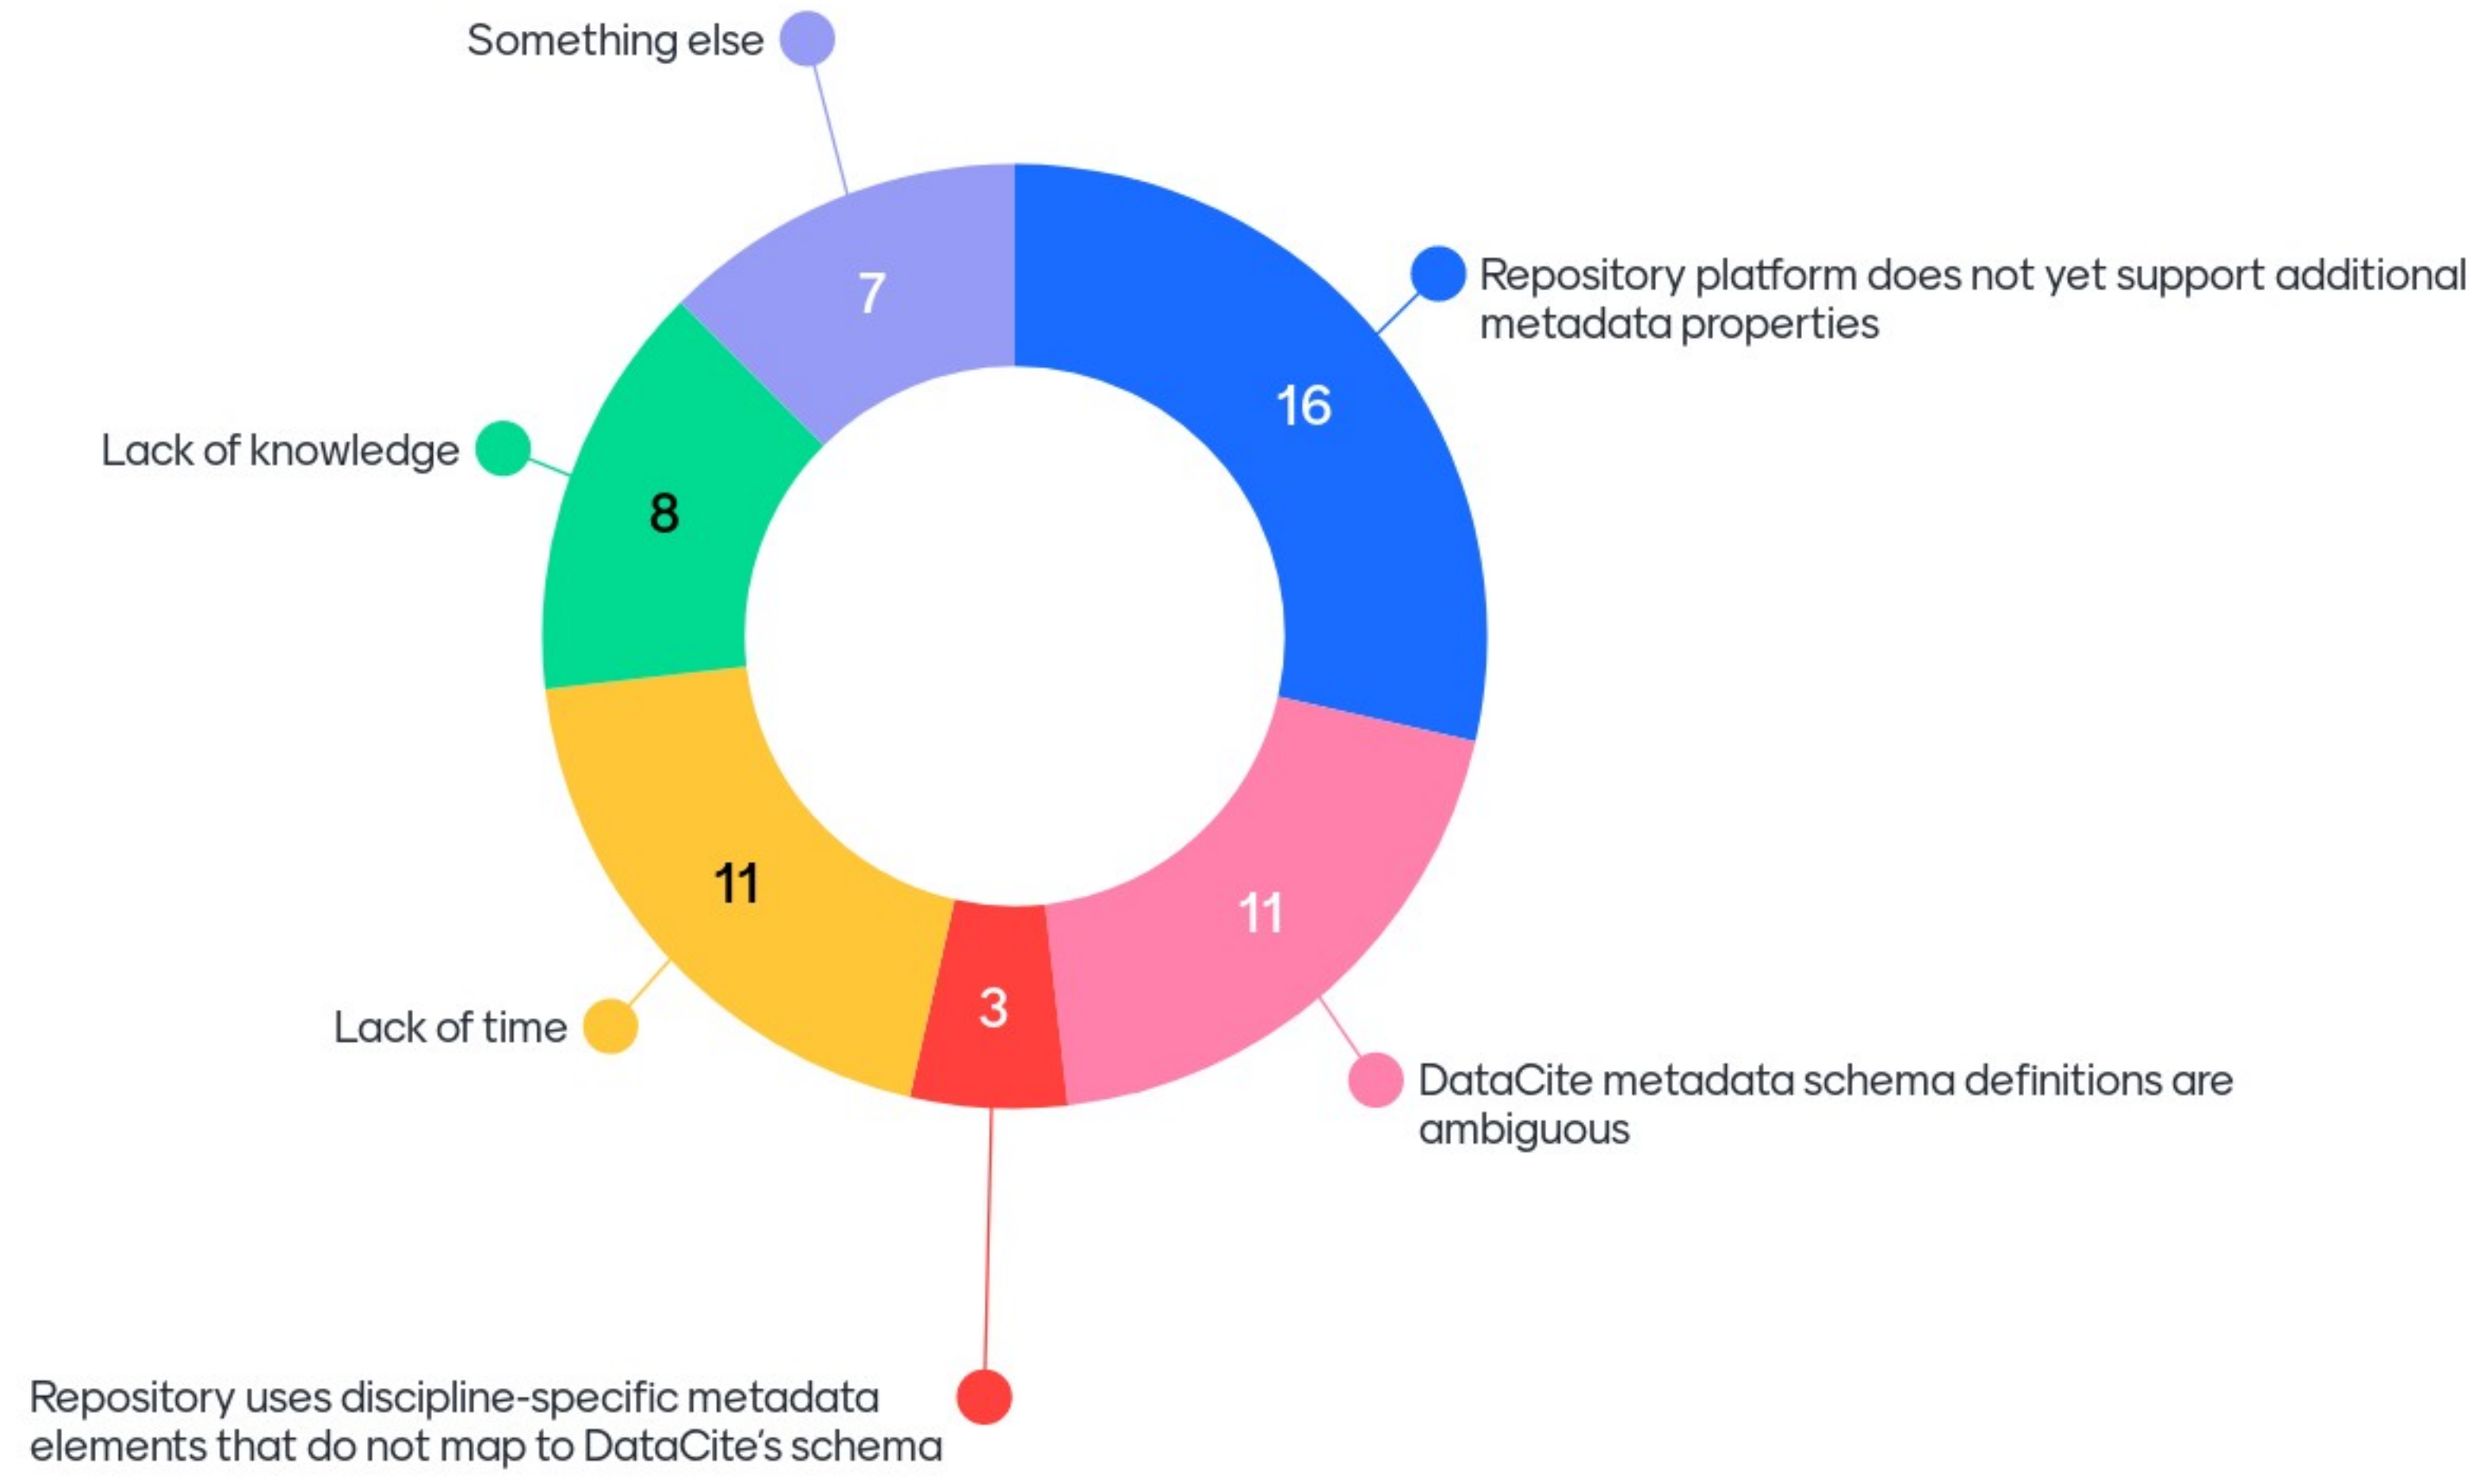

Rank	Property
1st	Subject
2nd	Description
3rd	Date
4th	Contributor
5th	Language
6th	RelatedIdentifier
7th	FundingReference
8th	Format
9th	Version
10th	Rights
11th	AlternateIdentifier
12th	Size
13th	GeoLocation

27

Which of the following other types of identifiers do you include in DOI metadata?

relatedIdentifier — 4

funderIdentifier (fundingReference) - e.g. Crossref Funder ID — 1

affiliationIdentifier (Creator or Contributor / affiliation) - e.g. ROR — 3

nameIdentifier (Creator or Contributor) - e.g. ORCID — 16

What are the barriers to including additional metadata with DOI registration? [check all that apply]

- Something else — 7
- Lack of knowledge — 8
- Lack of time — 11
- Repository uses discipline-specific metadata elements that do not map to DataCite's schema — 3
- DataCite metadata schema definitions are ambiguous — 11
- Repository platform does not yet support additional metadata properties — 16

What elements of the metadata schema are ambiguous ?

relatedItem

RelatedItem, also entry for the subject on the webapp is quite tricky

<subject>, it all depends how it is locally interpreted!

Publisher; relatedItem

Publisher

subject

Overlap between contributor roles - lack of clear definitions/boundaries

subject

Publisher

14

What elements of the metadata schema are ambiguous ?

relationType and how to apply subject properties to chemical substance identifiers

relationType

relation type

item relation type - how to use it, when use which

Publisher - the definition of this term is not clear. What do you mean - repository or real publisher? Technical information. Methodology.
